

PropPulse CRM — How It Works

A visual guide from creating a project to sending a quotation. Click any step card to see the form fields and what happens when you save.

1

Create Project

Enter the basic details of the new real-estate project

 Sales Manager / Admin

 Screen: Projects → Create Project → Step 1

WHO DOES THIS?

Sales Manager or Admin creates the project record so the team can start adding details.

WHAT TRIGGERS THE NEXT STEP?

After saving, you move to **Step 2 — Add Address** in the project wizard.

Project Details Form

Aa

Project Name ● Required

The official name of the project (e.g. "Sunrise Heights")

Aa

Description ● Optional

A rich-text overview of the project for marketing

Aa

RERA Project ID ● Optional

Government registration number (letters, numbers, and hyphens only)

▼

Sales Channel ● Optional

Which sales person is responsible for this project

Aa

Notify To Emails ● Optional

Email addresses to notify when the project is created

Launched On ● Required

When the project was or will be launched (today or later)

Expected Completion ● Required

When construction is expected to finish

Possession Date ● Required

When buyers can take possession (must be after expected completion)

☒

Enable Inventory ● Optional

Turn on to allow adding units later (warning: cannot be turned off)

Aa

Created By ● Auto-filled

Your name is recorded automatically when you create the project

✓ **When you click Save / Next**

The system saves the project name, dates, sales assignment, and settings. The project is created as a **draft** and you are taken to the Address step. Notification emails are sent if you added any.

Project saved → Continue the wizard

2

Location & Marketing Info

Add the project address, virtual walkthrough, amenities, and brochures

 Sales Manager / Admin

 Screen: Create Project → Steps 2, 3, 4 & 5

WHO DOES THIS?

Same person completing the project profile
— usually Sales or Marketing team.

WHAT TRIGGERS THE NEXT STEP?

After all four sub-screens are saved, you
move to **Step 3 — Portal Integration & Finish.**

Step 2A — Address Form

Aa Search Project Address ☒ Required

Type to search — picks location from map

Aa Full Address ☒ Required

Complete street address of the project site

Aa Street / Road ☐ Optional

Aa Locality / Area ☐ Optional

Aa City ☒ Required

Aa State ☒ Required

Aa Country ☒ Required

Aa Pin Code ☒ Required

Map Pin (Latitude & Longitude) ☐ Optional

Drag the map pin to set exact location

Aa Office Address Line 1 & 2 ☐ Optional

Sales office address if different from site

Step 2B — Virtual Walkthrough

☒ **Enable Virtual Reality** Optional

Turn on to offer a 3D walkthrough

 **Upload 3D File (.glb)** Required if VR is on

3D model file for the virtual tour

Step 2C — Amenities & Specifications

☒ **Amenity Toggles** Optional

Sr Citizen Corner, Gazebo, Kids Play Area, Garden, Jogging Track

Aa **Specification Title** Required (at least 1)

e.g. "Construction Quality"

Aa **Specification Description** Required

Details about that specification

Step 2D — Brochures

 **Upload Brochures** Required (at least 1)

PDF, JPG, or PNG files (up to 10)

Aa **Email Template Name** Optional

For sending brochures by email

Aa **Email Subject & Content** Optional

☒ **Template Active** Optional

☒ **When you click Save on each sub-screen**

The system saves the project location on the map, any VR file, selected amenities, specification list, and uploaded brochures. You can come back and edit these anytime before finishing the project.

Address & marketing info saved

3

Finish Project Profile

Connect to property portals and mark the project as complete

 Sales Manager / Admin

 Screen: Create Project → Step 6 (Portal Integration)

WHO DOES THIS?

Admin or Sales Manager finalizes the project for listing on external portals.

WHAT TRIGGERS THE NEXT STEP?

Once marked **Complete**, the project is ready for **Step 4 — Project Setup** (inventory configuration).

Portal Integration Form

Aa **India Property Code**  One required

Your listing code on India Property portal

Aa **Magicbricks Code**  One required

Your listing code on Magicbricks portal

Aa **Project Status**  Auto-set to Complete

Changes from Draft to Complete when you finish this step

When you click Finish / Submit

The system checks that name, address, at least one specification, at least one brochure, and a portal code are all filled in. If everything is OK, the project is marked **Complete** and saved. You can now set up inventory (towers, units, etc.) in Project Setup.

Project profile complete → Go to Project Setup

4

Project Setup

Choose project type, building structure, and create towers / sectors / floors

 Admin / Inventory Manager

 Screen: Project Setup

WHO DOES THIS?

Admin or inventory manager configures how the project's units are organized (towers, sectors, plots, etc.).

WHAT TRIGGERS THE NEXT STEP?

After creating at least one tower/sector/phase, you can **Add Units** under each section.

Setup Step A — Project Type & Structure

▼ Project Type ● Required

Residential, Commercial, Industrial, Mixed-Use, or Land / Plotting

▼ Project Structure ● Required

e.g. Towers, Sectors, Villas, Plots, Phases — options change based on type

Setup Step B — Building Hierarchy (Towers / Sectors / Floors)

Aa Section Name ● Required

e.g. "Tower A", "Sector 1", "Phase 2" — must be unique in the project

Aa Description ● Optional

Notes about this section

Aa Sub-section Name ● Optional

e.g. Wing, Floor, or Block — depends on project structure

Aa Section Type ● Auto-set

System picks the right label (Tower, Sector, Floor, etc.) based on your structure choice

 **When you click Save**

The system saves your project type and structure, automatically prepares the right unit categories (flat, plot, shop, etc.), and stores each tower/sector/phase you create. You cannot delete a section that already has units in it.

Hierarchy created → Click "Manage Units" on any section

5

Add Units

Create individual flats, plots, or shops under each tower / sector

 Sales Executive / Admin

 Screen: Project Setup → Manage Units

WHO DOES THIS?

Sales team or admin adds each sellable unit with area, price, and availability status.

WHAT TRIGGERS THE NEXT STEP?

Once at least one unit exists with a price, you can go to **Quotations** to set up pricing templates.

Unit Details Form

Aa

Unit Number

 Required

e.g. "A-101" — must be unique in the project (duplicate warning shown instantly)

Status

 Optional

Available, Booked, Sold, or Blocked (default: Available)

Unit Type

 Auto-filled

Flat, Plot, Shop, etc. — picked automatically from project setup

#

Carpet Area (sq ft)

 Required

Usable floor area — must be greater than zero

#

Super Built-up Area (sq ft)

 Optional

Total area including common spaces

Aa

Facing

 Optional

e.g. North, Park View, East

Unit Amenities

 Optional

Balcony, Parking, Garden View, Corner, Modular Kitchen, Lift

Assigned Lead

 Optional

Link a customer lead interested in this project

#

Price per sq ft (₹)

Optional

Used later to calculate quotation amount

**When you click Save Unit**

The system saves the unit number, areas, price, status, and amenities under the selected tower/sector. If the unit number already exists, you'll see an error and cannot save until you change it.

Units saved → Open Quotations for this project

6

Generate Quotation

Set up pricing rules, generate a quote for a unit, and share the PDF with the client

 Sales Executive

 Screen: Quotations → Select Project

WHO DOES THIS?

Sales executive creates a formal price quote for a specific unit and sends it to the customer.

WHAT HAPPENS AFTER?

Quotation can be marked Accepted (one per unit) or Rejected. Accepted quotes lock that unit's pricing decision.

Tab A — Pricing Template Setup

Aa **Template Name** ● Required

e.g. "Standard Quotation" — new versions created if you update

☒ **Set as Active Template** ● Optional

Makes this the default pricing template for the project

☒ **Has Terrace Units** ● Optional

For projects with terrace pricing (future feature)

Aa **Line Item Label** ● Required

e.g. "GST", "PLC Charges", "Maintenance Deposit"

▼ **Calculation Type** ● Required

Fixed amount, % of basic price, % of running total, or rate × total area

Value ● Required

The number used in the formula (e.g. 5 for 5% GST)

☒ **Is Optional Line Item** ● Optional

Customer can choose to exclude this when generating the quote

Tab B — Generate Quotation

▼ **Select Unit** ● Required

Pick which flat/plot/shop to quote

▼ **Pricing Template** ● **Required**

Which pricing rules to apply

Aa **Client Name** ● **Required if no lead**

Customer name on the quotation (auto-filled if unit has a lead)

 Quotation Date ● **Optional**

Defaults to today

☒ **Exclude Optional Charges** ● **Optional**

Uncheck any optional line items you don't want on this quote

Aa **Quotation Number** ● **Auto-generated**

Format: QT-2026-00001 — assigned when you generate

Grand Total ● **Auto-calculated**

Basic price (area × rate) + all charges = final amount

 Tab C — View Past Quotations

Aa **Quotation List** ● **Read-only**

See all generated quotes — download PDF anytime

▼ **Status** ● **Optional**

Draft, Sent, Accepted, or Rejected

✓ **When you click Generate Quotation**

The system calculates: **Total Area** = Carpet + Super Built-up, then **Basic Price** = Total Area × Price per sq ft. It adds each charge line (GST, PLC, etc.) in order and creates a unique quotation number. A PDF with your company letterhead is ready to download and share with the client. The quote is saved permanently — it cannot be edited after creation.

After the quotation is shared with the client...

 Accepted

Only one accepted quote allowed per unit. Unit pricing is confirmed.
Proceed with booking.

 Rejected

Client declined. You can generate a new quotation with different options or pricing.

 Draft / Sent

Quote saved or shared but not yet decided. Follow up with the client.

Scope of Improvement

Suggested enhancements to simplify the CRM for sales teams. This guide reflects the recommended experience — some items below are not yet live in the app.

1 Remove "Is Active" from Create Project (Step 1)

New projects do not need an active/inactive toggle at creation time. The system should default all new projects to active. This field adds unnecessary confusion for sales staff on day one and is better managed later from Project Management if a project must be hidden.

2 Simplify the 6-step project wizard

Combine Address and Office Address into one screen, and group VR + Amenities into a single "Marketing" step to reduce clicks before a project is ready for inventory setup.

3 Auto-enable Inventory when Project Setup starts

Instead of asking users to tick "Enable Inventory" during project creation, automatically turn on inventory when they open Project Setup — with a clear one-time confirmation.

4 Quotation status updates from the UI

Allow sales executives to mark a quotation as Sent, Accepted, or Rejected directly from the quotation list — without needing admin support.

5 Pre-fill client name from assigned lead

When generating a quotation for a unit that already has a lead assigned, automatically fill the client name and show lead contact details on the PDF.

6 Clearer duplicate unit warning

Show the existing unit's tower/sector when a duplicate unit number is entered, so sales staff know exactly which record conflicts.
